Motivated and eager **Junior DevOps** and **Test Automation Engineer** with a foundational understanding of automation practices and CI/CD pipelines. Recently completed relevant coursework and hands-on projects that fostered skills in scripting and test frameworks. Proficient in working with version control systems and willing to learn quickly in a fast-paced environment. Enthusiastic about collaborating with development and operations teams to streamline processes and enhance software quality. Ready to contribute innovative ideas and a fresh perspective, while further developing technical expertise in a dynamic team setting.
